EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE CLAIMS

Claim 1, line 16, the word "pretreatment" has been deleted and replaced with the word -- pre-treating --.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims **1-18** are allowable over the prior art of record because the prior art does not teach or suggest a method for the electrolytic coating of a material with an aluminum, magnesium or alloys of aluminum and magnesium, said method comprising the steps of pre-treating and performing as presently claimed, esp., the step of performing the electrolytic coating in the same electrolytic bath immediately thereafter by reversing polarity of the material, the electrolytic bath consisting of organoaluminum compounds of general formulas (I) and (II).

The prior art does not contain any language that teaches or suggests the above.

Dotzer et al. do not teach performing the electrolytic coating in the same

electrolytic bath immediately thereafter by reversing polarity of the material, the electrolytic bath consisting of organoaluminum compounds of general formulas (I) and (II).

Dotzer et al. teaches when articles comprising magnesium, zinc or titanium are treated, process steps 1 and 2 are first conducted. Thereafter, the article, wet with toluene, is immersed into the molten pretreatment electrolyte bath of 80° to 100°C bath temperature, consisting, e.g., of a 1:1 mixture of Na[Al(C₂H₅)₄] and K[Al(C₂H₅)₄], and is anodically stressed for a short period in order to loosen and remove the surface film and scale. Subsequently, the article is immersed, wet with pretreatment electrolyte, directly into the aluminizing bath, under inert gas (N₂), and the cathodic aluminizing electroplating process is conducted, accompanied by electrode agitation (col. 7, lines 17-29).

Therefore, a person skilled in the art would not have been motivated to adopt the above conditions, and a prima facie case of obviousness cannot be established.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to EDNA WONG whose telephone number is (571) 272-

1349. The examiner can normally be reached on Mon-Fri 7:30 am to 4:00 pm.
